Summary

Artificial Intelligence student with a strong interest in Machine Learning, Deep Learning, NLP, and Generative AI. Experienced in building AI and data-driven projects using Python, TensorFlow, Scikit-learn, and SQL. Passionate about solving real-world problems through technology, with a continuous desire to learn, collaborate, and contribute to innovative AI solutions.

Education

Vellore Institute of Technology *Oct 2022 – Present*
5 Year Integrated M.Tech in Artificial Intelligence 8.15 CGPA

Skills

- **Programming Languages:** Python, SQL
- **AI & Machine Learning:** Machine Learning, Deep Learning, NLP, Generative AI
- **Frameworks & Libraries:** TensorFlow, Keras, Scikit-learn, Pandas, NumPy
- **Data Analysis:** Data Preprocessing, Feature Engineering, Model Evaluation

Experience

Fin Infocom *Oct 2025 – Dec 2025*
ML Intern Hyderabad, Telangana

- Developed an NLP-based sentiment analysis pipeline for Reddit stock discussions using Python.
- Performed data cleaning, preprocessing, and feature extraction using VADER sentiment scoring and TF-IDF.
- Built and trained an LSTM-Attention model using TensorFlow to classify investor sentiment.
- Evaluated model performance using accuracy, precision, and recall metrics.

Projects

Stock Market Sentiment Analysis Using Reddit Data

- Collected stock-related discussions using the Reddit API (PRAW) and performed NLP preprocessing.
- Queried and filtered relevant data using SQL before applying feature engineering techniques.
- Applied VADER sentiment analysis and TF-IDF vectorization to extract sentiment features.
- Designed and trained an LSTM-Attention deep learning model to classify investor sentiment.
- Evaluated model performance using classification metrics to analyze sentiment trends.

Fake News Detection Using Machine Learning

- Built a fake news detection model using Passive Aggressive Classifier with TF-IDF vectorization.
- Performed data cleaning and feature engineering using Pandas.
- Used SQL queries to filter and organize dataset records prior to model training.
- Evaluated performance using Precision, Recall, and F1-Score.

Music Recommendation System

- Developed a recommendation system using collaborative filtering techniques.
- Preprocessed user-item interaction data using Python and Pandas.
- Achieved over 90% prediction accuracy and evaluated performance using MSE and RMSE.

Certifications

- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional – Certificate
- Oracle Cloud Infrastructure 2025 Certified Data Science Professional – Certificate
